Certification of REACH Compliance

Accel International, a global supplier of un-insulated electrical conductors, has been proactive in its approach to protecting and conserving the environment. Based upon our due diligence and investigation all Accel International products sold into the European Union are in compliance with the following;

- The European Union Regulation 1907/2006, also known as the REACH (Registration, Evaluation, Authorization and Regulation of Chemicals) regulation (2006/121/EC), as it relates to the presence of the European Chemicals Agency (ECHA) Candidate List of Substances of Very High Concern (SVHC), as amended on **July 8th 2021** and the restricted substance list (REACH Annex XVII) as amended on **January 25th, 2022**.

Based on information obtained from our raw material suppliers, we can presently certify that NO Accel International products contain SVHC or Annex XVII restricted substances as listed by the ECHA under the provisions of REACH and that NONE of Accel International's products exceed the designated maximum concentrate levels by weight of homogeneous materials for lead, mercury, hexavalent chromium, chromates, polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE) and cadmium. We also certify that all Accel International products are BPA-Free.

Accel International will take the appropriate actions to fully comply with REACH regulations and will support efforts by its customers to reach our common goal to build a socially and responsible supply chain.

For additional information regarding REACH compliance of Accel International products, please contact Customer Service. Customer service can be reached by phone at 203.237.2700.

Yours Sincerely,

Ernesto Rodas
VP of Engineering & QA Manager
Accel International
